Rezume

Vlasyuk Oleksandr Stepanovych,

doctor of economic science, professor, director of the National Institute of International Security Problems;

Preyher Davyd Kasparovych,

doctor of economic science, professor, advisor of the National Institute of International Security Problems

«Problems of Ukraine's International cooperation in nuclear energy sector»

The article analyses the multifold problems of Ukraine's international cooperation in the sphere of extraction and enrichment of the uranium, the improvement of security of nuclear plants exploitation, the treatment of the spent nuclear fuel and radioactive wastes and the training of qualified personnel.

Semenchenko Andriy Ivanovych,

candidate of technical science, senior research fellow, working for doctor's degree at the National Academy of State Management under the President of Ukraine

«Categorical-conceptual instruments of strategic planning for ensuring national security»

The article examines the state and trends of developing the categorical-conceptual instruments in the national security sphere in the context of developing the system of strategic papers. It specifies the already known and formulates new categories, definitions and terms of the strategic planning and management theory, which will allow the better understanding of the rules of strategic planning and management in the national security sphere as well as the mechanisms of their detection in the State management practice, the development and realization of State policy in this sphere, the evaluation of their effectiveness etc. Besides, the author offers recommendations as of further improvement and consistency of the structure model and hierarchy of this system as well as the system of strategic papers related to the social and economic development of Ukraine, which will increase the effectiveness of development and realization of State policy and State management in the national security sphere.

Vasylytsiv Taras Hryhorovych,

candidate of economic science, head of department of the regional branch of the National Institute of Strategic Studies in Lviv

«Improvement of system of State regulation of business activities»

The article highlights the negative trends of business development in Ukraine, which reveal the utterly low level of its economic security. The author defines the main vices of Ukraine's State regulation system hampering the business progress and suggests measures to improve the system of State regulation of business activities in Ukraine.

Barannik Vyacheslav Oleksiyovych,

senior research fellow of the Kniipropeetrovsk branch of the National Institute of Strategic Studies

«Energy efficiency of State economy. Strategic dimension»

The article deals with the perspectives of achieving the accepted level of GDP capacity in Ukraine as a strategic task of its policy in energy sphere and in comparison with the dynamics of achieving the current levels of this energy security index in other regions and countries of the world.

Mishyn Andriy Oleksandrovyich,

candidate of political science, head of department of the National Institute of International Security Problems

«On developing cooperation between Ukraine and Shanghai Cooperation Organization in the framework of regional security systems formation»

This article is an attempt to prove the necessity of developing cooperation between Ukraine and Shanghai Cooperation Organization (SCO). Since this organization is not a military bloc similar to the Collective Security Treaty Organization (the Tashkent pact) or the economic structure similar to EurAsES, this doesn't conflict with the European or Euro-Atlantic integration of Ukraine (into the EU or NATO). The Eurasian region is developing very fast, so Ukraine is in dire need of a systematic strategy for the region in the whole as well as for its specific structures like SCO.

Melnyk Yuriy Ivanovych,
*master of State administration, head of
 department of the regional branch of the
 National Institute of Strategic Studies in
 Kdessa*

**«Realization of Ukraine's national
 interests in the context of border
 guard cooperation in the Lower
 Danube region»**

The article highlights the characteristic features of Ukraine's Danube region as a frontier territory, particularly in the context of the Ukrainian-Moldavian relations. The author carried out a complex analysis of the development of this region and worked out the guidelines of the State policy in the context of protecting Ukraine's national interests.

Serov Dmytro Ihorevych,
*candidate of historical science,
 head of department of the regional branch of
 the National Institute of Strategic Studies in
 Kdessa*

**«Prospects of Ukraine's participation in the
 exploitation of hydrocarbon resources in East
 Arabian countries»**

The article analyses Ukraine's perspectives as of receiving oil from the Arab countries of the Near East with the view of diversifying the energy carrier resources. It also outlines the Ukrainian projects of exploitation of the Arab oilfields, the options of oil transportation and its selling in the world markets.

Moskalyk Roman Yaroslavovych,
*candidate of economic science, associate pro-
 fessor, research fellow of the regional branch
 of the National Institute of Strategic Studies
 in Lviv;*

Chornyy Oleksandr Tymushorovych,
*research fellow of the regional branch of the
 National Institute of Strategic Studies in Lviv*

**«Basic factors of influence on Ukraine's tech-
 nological development in the context of join-
 ing WTO»**

The article examines the basic factors of Ukraine's technological development relating to Ukraine's aspirations to join the World Trade Organization (WTO). The author provides the theoretic substantiation of the factors of Ukraine's technological development under its integration into the world economy, gives the in-depth analysis the WTO regulation system in the sphere of the intellectual property protection rights and technology

transfer and describes changes in Ukraine's legislation towards adaptation to the requirements of the Agreement on the trade aspects of the intellectual property rights. The article also defines the advantages and risks of joining the WTO for Ukraine's technological development.

Zhankuliyev Amanzhol Kazbekovich,
*applicant of the International Yasavi
 Kazakh-Turkish University*

**«Investment cycles management in the
 economics»**

The article deals with the issues of the investment process management in the systematic approach. The author reveals connection between the basic categories of this process and shows its role in increasing the effectiveness of the social economic system.

Zapatrina Iryna Viktorivna,
*candidate of economic science,
 deputy Minister of Housing and Communal
 Services of Ukraine*

**«Housing and communal services reform in
 the national security context»**

The article is dedicated to the problems of the housing and communal services reform. It provides the analysis of the normative documents on housing and communal services reform as of their capacity to solve the existing problems of this sphere. The author offers recommendations which would help improve the approaches to the reform of this sector.

Karpenko Hanna Vasylivna,
*candidate of economic science,
 state expert of the National Institute of
 International Security Problems*

**«Transformation of transnational
 structures under economic globalization
 processes»**

The article considers the characteristic features of the functioning of the transnational corporations under globalization of the world economy; describes changes in their development strategies and activity tactics in the international and national markets. The author pays special attention to the issues of protecting the national states' sovereignty and preventing situations bringing the potential threat to the national security of the receiving countries.

Vingranovskyy Andriy Mykolayovych,
*working for candidate's degree at the Research
Financial Institute of the Ministry of Finance
of Ukraine*

**«Structure and sources of covering expenses
for local budgets development»**

The article analyses the terminology used in the budget sphere, particularly relating to the forming of the economic development mechanisms. It also explains the differences in normative legal base and provides recommendations as of improving the structure and sources of covering the expenses for local budgets development.

Shevtsov Anatoliy Ivanovych,
*doctor of technical science, professor, director
of the Knioproetrovsk branch of the National
Institute of Strategic Studies;*
Bondarchuk Roman Vasylyovych,
*candidate of technical science, head of depart-
ment of the Knioproetrovsk branch of the
National Institute of Strategic Studies*

**«Strategic approaches in choosing innovative
model of Ukraine's defence-industrial complex
development»**

The article is dedicated to the problem of the innovative development of the defence-industrial complex (DIC) of Ukraine; it formulates the demands to the further development of Ukraine's DIC, defines the principles, ways and means of forming the strategy of innovative development of the defence-industrial sphere as well as the mechanisms and instruments of their realization. The author considers one of the possible options of the innovative model of developing Ukraine's DIC, which provides for the development of the fundamental research and engineering sector for a limited quantity of technologic directions financed by the business structures.

Sherhin Serhiy Oleksandrovysh,
*doctor of political science, professor, head of
department of the Kiplomatic Academy of
Ukraine;*
Horobets Ihor Volodymyrovych,
*candidate of historical science, associate pro-
fessor of the Kiplomatic Academy of Ukraine*

**«Armaments markets of South-East Asia
under new geostrategic reality»**

The article provides a complex analysis of the issues related to the current state, specificity and dynamics of development of South-East Asia's arms markets; explores the factors influencing the militarization process in South-East Asia under the ongoing regional geopolitical

transformations. The author studies the stands, interests and motives of ASEAN countries in purchasing modern armaments and the issues of military-technical cooperation with their partners: the USA, EU and RF nations and China. In this connection the author considers problem issues of strengthening Ukraine's stands in the region's arms and defence technology markets.

Bodruk Oleh Serhiyovych,
*doctor of political science, associate professor,
head of department of the National Institute
of International Security Problems*

**«The Black Sea Fleet in the context of
Ukrainian-Russian relationship»**

The article examines the military-political state of the Black Sea region in the beginning of the XXIst century, outlines the conflict areas and possible reasons of conflict escalation. In the light of the problem of basing of the RF's Black Sea Fleet on Ukraine's territory the author analyses the Ukrainian-Russian relationship considering modern challenges and threats.

Sukhorukov Arkadiy Ismayilovych,
*doctor of economic science, professor,
head of department of the National Institute
of International Security Problems;*
Onofriychuk Petro Vasylyovych,
*head of the Chief Administration of the
Ministry of Defence of Ukraine*

The authors suggest applying the method of compromise in logistic management of Ukraine's armed Forces. The article proves that coordinating the interests of the participants of the logistic support of the army on all stages of planning and implementing the material flows facilitates a more effective use of the material resources.

Lobko Mykhaylo Mykolayovych,
*candidate of military science, associate profes-
sor, state expert of the Military Security
Department of the Apparatus of the National
Security and Defence Council of Ukraine;*
Lobanov Anatoliy Anatoliyovych,
*candidate of military science, associate pro-
fessor, working for doctor's degree at the
Department of national security and defence
strategy of the National Academy of Defence
of Ukraine;*

Punda Yuriy Vasylyovych,
*lieutenant colonel, junior scientific assistant of
the Department of national security and
defence strategy of the National Academy of
Defence of Ukraine*

**«Problems of strategic planning in military
sphere: experience and ways of resolving»**

The article recites the views on the hierarchy of documents and procedures of strategic plan-

ning in the military security sphere. It justifies the necessity and suggests the structure of the new document on strategic planning.

Malynovska Olena Anatoliyivna,
doctor of science in state management, senior research fellow, head of department of the National Institute of International Security Problems

«Migration statistics in the context of State migration policy development»

The article analyses the sources, structure and methods of collection of the statistic information on Ukraine's international migration, emphasizes its incompleteness and incomparability and concludes that, on the one part, the vices of the migration statistics reflect the unsatisfactory level of state regulation of migration processes, and, on the other part, they are one of the reasons of delay in defining the core principles of Ukraine's migration policy and building an effective management system.

Chekan Iryna Anatoliyivna,
candidate of economic science, working for doctor's degree at the National Institute of Strategic Studies

«Problems of human capital exchange between Ukraine and Poland»

The article is dedicated to the problems of human capital exchange between Ukraine and Poland in the economic security context. The author makes the analytical assessment of the existing situation, proves that the human capital exchange in migration and education spheres has an asymmetric character and offers guidelines for the regulation of the international human capital exchange in labor migration sphere. The article also grounds the recommendations as of reducing the asymmetry in Ukraine's education field.

Ozhevan Mykola Andriyovych,
doctor of philosophy, professor, head of department of the National Institute of International Security Problems;
Nedbayevskyy Serhiy Leonidovych,
state expert of the National Institute of International Security Problems;
Dubov Dmytro Volodymyrovych,
chief consultant of the National Institute of International Security Problems

«Indicators of real threats to Ukraine's national security in the information sphere»

The article analyses the risks, threats and challenges to Ukraine's national security in the information sphere, that determine the scales of human activities. The methodology bases on the principle of descending from abstract to concrete. The article proves that the information threats shouldn't be treated as some abstract phenomena non-connected to the subject and objectives of his activities which is often peculiar to Ukraine.

Petrov Valentyn Volodymyrovych,
working for candidate's degree at the National Institute of International Security Problems

«Information dimensions of military policy»

In the context of the information component of military security the article analyses the principal boundaries between the modern preventive or preemptive warfare and the crisis management as an obligatory element in the activity of the state and non-governmental subjects of international relations. The author proves that by distorting the balance and drawing a wide world response, the crises present a real threat to the aims, reputation and even the existence of the modern states as the main subjects of international relations. The article grounds the assertion that the preventive management plays a leading role in the modern military security structure.
